IPT GPAT TEST 3 (PHARMACOLOGY) ON DATE 04-10-2020 AT 5 PM

Answer Keys of Test

1. The mechanism of action of antiepileptic drug is	All of the above
2. The drug which does not produce voltage dependent inactivation of sodium channel is	Vigabatrin
3. The drug which is not used for partial and generalised tonic clonic seizure is	Vigabatrin
4. The drug of choice for absence seizure is	Sodium valproate
5. The most effective drug used for status epilepticus in adult is	Diazepam
6. Phenytoin is used for treatment of	Grandmal epilepsy
7. Which of the following drug is effective in trigeminal neuralgia	Carbamazepine
8. The most common adverse effect of Carbamazepine are	Diplopia, Ataxia, Nausea
9. Lamotrigine can be used alone in treatment of all of the following except	Generalised tonic clonic seizure
10. Sodium valproate is effective against all of the following except	Partial seizure
11. Which of the following antiepileptic drugs may produce teratogenicity	All of the above
12. The most dangerous effect of antiepileptic drugs after large overdose is	Respiratory depression
13. The drug for migraine which is used as antiepileptic	Topiramate
14. The prolonged use of which anticonvulsant drug produces weight loss	Topiramate
15. All of the following are adverse effects of Sodium Valproate acid except	Osteomalacia
16. Parkinson disease is marked by a lack of which chemical in the brain	None
17. What is often the first symptom of Parkinson Disease?	Shaking of hand or foot
18. All the following are appropriate for initiating therapy for Parkinson Disease except	Amantadine
19. Entacapone is useful because it is	Block peripheral COMT
20. Parkinson Disease leads to overacting of	Substantia nigra Pars Compacta
21. Which of the following is statement regarding Selegiline is false? 21. Which of the following is statement regarding Selegiline is false	It is a MAO-A inhibitor
22. Which of the following is a pro-drug	L-DOPA
23. All are ergot derivatives used in Parkinson Disease except	Trihexylphenidyl
24. Antiparkinson drug which is selective COMT inhibitor	Entacapone
25. Patient in treatment of carbidopa + levodopa for long years now has wearing effect. What should be added to restore action?	Tolcapone
